

KitLockFlex KeyPad

Formerly known as the KL1100 KeyPad

The **KitLockFlex** KeyPad is a stylish, standalone digital lock designed for modern locker and cabinet application.

Sharing the same slimline profile and powered latch mechanism as the **KitLockFlex** RFID (formerly KL1100 RFID), this model retains the traditional keypad interface and familiar features found in classic KitLock by Codelocks products—now enhanced for improved performance and usability.

Engineered for reliability and flexibility, the KitLockFlex KeyPad offers:

- ✓ Up to 100,000 operations
- ✓ 20 User Codes
- ✓ Auto-Unlock at a scheduled time or after a predefined period
- ✓ A robust, low-maintenance design ideal for high-traffic environments

These enhancements make it a strong choice for facilities seeking a dependable standalone digital lock with expanded code capacity and intelligent access features.

The **KitLockFlex** KeyPad is available in Stone, a contemporary off-white finish that introduces a fresh, modern aesthetic to the **KitLockFlex** range. This softer alternative to classic black is designed to complement calm, refined interiors, blending seamlessly into environments such as spas, wellness centres, premium offices, and high-end locker rooms.

Product Dimensions

Code Management

KitLockFlex KeyPad has four code levels available:

- 8 digit Master Code
- 8 digit Sub-Master Code
- 4 digit User Code
- 6 digit Technician Code

The KitLock is supplied with two factory set codes:

- Master Code
- User Code

Before installing, change the Master and User Code by following the Programming and Operating Instructions.

Benefits

Auto-Unlock at a Set Time (Public)

Configure the lock to automatically unlock at a predefined time.

Maximum Locked Period (Public)

Configure the lock to automatically unlock after a predefined period.

Easy Installation

KitLock products are designed for easy install and the KitLockFlex KeyPad is no different, sharing the same fixing holes as the KitLockClassic (KL1000 Classic), retrofit is an option for many applications.

Functions

Private Function

This is the default function and is already pre-programmed in new locks. This is used where the same code will be repeatedly used, e.g. an employee with a personal locker/drawer.

Public Function

In this function the KitLock operates with a single User Code. The user enters a personal four digit code, this locks the lock. The same code is entered once only to open the lock and is automatically erased. The lock remains open ready for the next user. This function is used for short term, multiple occupancy applications.
