

## KL1000 G3

Applying advanced technology to our core products. The KL1000 G3 KitLock offers key override and front battery change capabilities providing ease of use and peace of mind.

The updated chrome effect back panel and handle finishes reflect their surroundings giving the lock a slimmer, more subtle aesthetic.

The updated chrome effect back panel and handle finishes reflect their surroundings giving the lock a slimmer, more subtle aesthetic. Sharing the same fittings & fasteners as the KL1000 Classic, this lock is easily retrofitted, ideal for upgrading existing cabinet and locker installations with increased flexibility and convenience for both guests and staff.

Easy to install or retrofit

Key Override capability

Front battery change

Private and Public Functions

## KL1000 G3

### FUNCTIONS

#### Two Modes of Operation

The KL1000 G3 retains the standard Public and Private Functions.

#### Private Function

This is the default function and is already pre-programmed in new locks. This function is used where the same code will be repeatedly used, e.g. an employee with the same locker/drawer in the workplace.

#### Public Function

In this function the KitLock operates with a single User Code. The user enters a personal four digit code, this locks the lock. The same code is entered once only to open the lock before automatically being erased and ready for the next user. This function is used for short term, multiple occupancy applications, e.g. hot desking in an office or a locker in a gym.

### Features

#### Key Override

Allows key holders to access the locker in the event of a forgotten code or an emergency. Override key available separately.

#### Front Battery Change

The KL1000 G3 battery compartment can be accessed via the front of the lock, eliminating the need for battery override. Entering a valid code and turning the handle reveals a security screw which, once removed, allows the cover to slide up and batteries to be replaced.

#### 24hr Auto-Unlock Countdown Timer

When operating in Public Function, the KL1000 G3 can be programmed to auto-unlock between 1 and 24 hours after locking\*\*, saving valuable locker management time.

#### 20 User Codes

The KL1000 G3 offers up to 20 unique 4 digit User Codes when operating in Private Function, thus allowing a single cabinet to be accessed by multiple users.

#### Easy Retrofit

The KL1000 G3 shares the same fittings and fasteners as all KL1000 KitLocks, therefore existing installations can be easily upgraded and retrofitted in a matter of minutes.
